UNIVERSITY OF BIALYSTOK

Development is in our nature

The broadest offer in the region, international research projects, excellent learning conditions, modern investments, cooperation with employers and interesting student life. This is the University of Białystok – the largest university in north-eastern Poland, which is developing rapidly, is open to cooperation and is not afraid of challenges. It ranks well in the national rankings and is included in international rankings.

University of Białystok greatest strength is its people! They are wonderful students and graduates, as well as scientists who are successful on a global scale. Choose to grow in the best company.

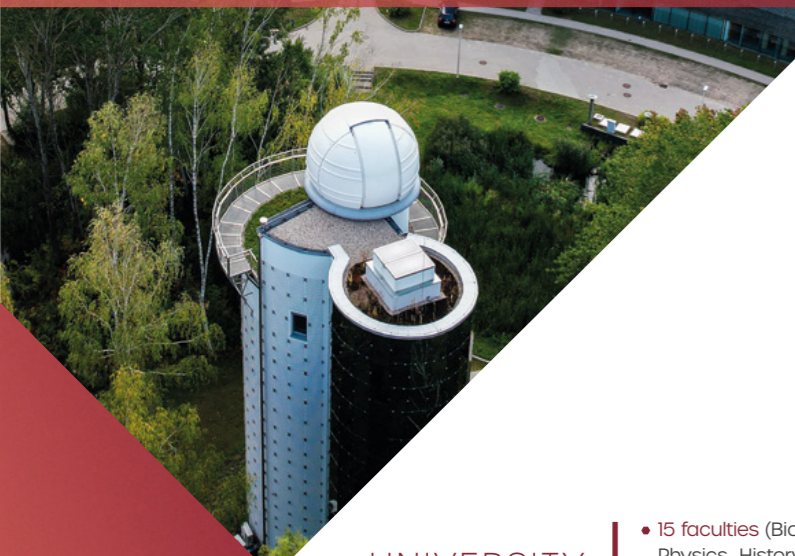

From campus to the stars!

The campus of the University of Białystok is the largest investment in the University's history and an architectural gem that arouses admiration not only among students. Surrounded by a forest, the modern buildings of steel, concrete and glass provide excellent conditions for teaching, research and scientific development. The exact sciences and natural sciences already have their headquarters on the campus, but the humanities and social sciences will also move here.

Whoever wants to, take a look at the stars! The campus is home to a 6-story tower with an opening dome, which houses the Planetarium and Observatory. At its heart is the unique ASA 600 telescope, weighing several hundred kilograms.

Also close to the students is the state-of-the-art University Library with a reading room with the mezzanine, an inner courtyard and space for nearly one million volumes.

UNIVERSITY OF BIALYSTOK

- 15 faculties (Biology, Chemistry, Economics and Finance, Philology, Philosophy, Physics, History, Computer Science, Mathematics, Education Sciences, Law, Sociology, International Relations, Cultural Studies, Management)
- 3 doctoral schools (Humanities, Social Sciences, Exact Sciences and Natural Sciences)
- Branch of University of Białystok in Vilnius (Faculty of Economics and Computer Science) - University of Białystok is the only Polish university that has a branch in Lithuania
- nearly 9 000 students, doctoral candidates and postgraduate students
- approximately 1,300 employees - the majority of whom - almost 800 - are academics

Science with successes

Researchers from the University of Białystok are authors of breakthrough discoveries, participate in international projects, publish their work in the world's most prestigious scientific journals and publications, and are respected experts. University of Białystok representatives can also be found on the international list of top scientists in terms of the citability of their works.

The University of Białystok is a regional leader in obtaining grants from the National Science Centre. It is also the only university in Poland to receive a Certificate of Excellence in Education in the field of law.

Active as a student

More than 60 student research clubs and organizations are active at University of Białystok. Thanks to them, students can develop their scientific, social, cultural, sports and even... fishing passions. The pride of the University is also the Academic Choir. Student theatres are thriving. You can find something for yourself.

fields of study

International university

There are about 500 foreign students studying at University of Białystok. The university also participates in the Erasmus+ program and has more than 300 agreements with universities in European Union countries. There are also more than 100 bilateral agreements, including universities outside Europe. As it is well known - travel educates! University of Białystok students can study and practice abroad, spending one semester or one year at a partner University.

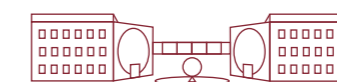

Studying at University of Białystok is studying in a good atmosphere!

CHOOSE BIALYSTOK

The city is student-friendly and affordable!

It is green, well-kept, compact, with modern infrastructure, efficient public transportation and an extensive network of bicycle paths. Everywhere is close and easy to get to. It is impossible to get bored in this city. The cultural and sports offer is very rich: theatres, museums, cinemas, swimming pools, ice rink, city beach, race track... Plus student clubs and pubs, which have been providing students with a good time for years. A great asset of Białystok is its location. It is surrounded by as many as three national parks, and just around the corner stretches the Knyszynska Forest.
